SUMMARY

Full Stack Developer with 1.10+ years of experience building scalable, production-ready web and mobile applications using React.js, Next.js, React Native, Python, and Django. Skilled in REST APIs, GenAI, LLM integration, RAG, vector databases, LangChain, and LangGraph, with a focus on AI-driven solutions.

SKILLS

- **Languages:** Python, JavaScript, TypeScript
- **Tech:** React.js, Next.js, React Native, HTML5, CSS3, Django, Node.js, PostgreSQL, SQLite, Docker, Tailwind CSS, REST APIs
- **GenAI:** OpenAI, LangChain, LangGraph, ChromaDB, RAG, Vector Embeddings, Semantic Search, Prompt Engineering, Ollama

EXPERIENCE

- **Associate Consultant – Full Stack Developer** 2025 – Present
Oodles Technologies
 - **Built and deployed scalable web and mobile applications using React.js, React Native, Django, and PostgreSQL.**: Contributed across requirements, development, API integration, testing, and production delivery.
 - **Developed scalable REST APIs and backend services using Django.**: Integrated AI/LLM capabilities with OpenAI, LangChain, and third-party AI services for intelligent application workflows.
 - **Implemented production-ready RAG pipelines using LangChain, vector databases, embeddings, metadata filtering, and semantic search.**: Built context-aware AI features and efficient knowledge retrieval workflows.
 - **Collaborated with clients and cross-functional teams to deliver production applications.**: Optimized performance, resolved technical issues, and maintained clean, reusable, and scalable code.
- **Frontend Developer Intern** 2024
Snaptic Minds Consulting Pvt. Ltd.
 - **Built responsive and user-friendly web applications using React.js, JavaScript, and Tailwind CSS.**: Implemented reusable UI components and integrated application features based on project requirements.
 - **Collaborated with clients and agile development teams to understand requirements and deliver new features.**: Troubleshoot issues, implemented fixes, and delivered tasks within project timelines.

PROJECTS

- **CareCob AI:**
 - Built an AI-powered elderly care platform supporting voice health check-ins, emergency monitoring, and caregiver workflows for **500+ users**.
 - Integrated **Vapi, OpenAI GPT-4, and Twilio** for AI voice interactions, sentiment analysis, automated caregiver alerts, and real-time communication workflows.
 - Engineered automated health reporting, caregiver management, notifications, user profiles, and **Stripe-based billing** across B2B/B2C workflows with **RBAC** for secure access.
- **NowVideo AI:**
 - Built a real-time communication platform supporting video/voice calls, chat, screen sharing, file sharing, polls, waiting rooms, and dial-in access.
 - Integrated **SignalWire and Vonage** for video conferencing and dial-in functionality, with **ElevenLabs and Wordly** enabling live voice translation.
 - Engineered real-time collaboration using **Socket.IO and Neon PostgreSQL** for synchronized communication, member management, persistent data, and secure role-based access.
- **Orqeva:**
 - Built a full-stack AI agent platform for creating, configuring, and deploying custom AI agents with configurable workflows.
 - Developed a **RAG pipeline** with PDF ingestion, document chunking, Nomic embeddings, ChromaDB metadata filtering, and multi-LLM routing across OpenAI, Groq, and OpenRouter.
 - Built a **visual workflow builder** using React Flow and LangGraph with SSE token streaming, persistent conversations, analytics, global search, and **RBAC** with Super Admin, Admin, and User roles.

AWARDS & CERTIFICATIONS

- **HackerRank – 2025:** Ranked **#1 in React**, earned a **5-star rating in React**, **5 badges in JavaScript Problem Solving**, and **3 badges in Python**. [HackerRank Profile](#)

EDUCATION

- **B.Tech in Computer Science & Engineering** Graduated
Anangpuria Institute of Technology & Management **CGPA: 7.8 / 10**
